both the nephrologist and the oncologist. Written by three pioneers in this growing subspecialty, Onco-Nephrology provides authoritative, definitive coverage of the mechanism and management of these two life-threatening diseases. This unique, single-volume resource covers current protocols and recommends management therapies to arrest kidney failure and allow oncologic treatments to continue and succeed. Addresses acute and chronic kidney diseases that develop from a variety of cancers. This includes direct kidney injury from the malignancy, paraneoplastic effects of the cancer, and various cancer agents used to treat the malignancy. Discusses key issues regarding kidney disease in patients with cancer, including

reference. Discusses increasingly complex problems due to more numerous and specialized anti-cancer drugs, as well as increased survival rates for both cancer and renal failure requiring long-term patient care. Covers anti-VEGF (antivascular endothelial growth factor) agents and cancer immunotherapies – treatments that are being recognized for adverse kidney effects. Utilizes a clear, logical format based on the ASN Core Curriculum for Onco-Nephrology, making this reference an excellent tool for board review, as well as a practical resource in daily practice.

Primary glomerulonephritis is a common renal disease which may eventually lead to chronic renal failure.

Treatment of glomerulonephritis is difficult. In particular the use of glucocorticoids and immunosuppressive drugs require expertise, knowledge of the drugs, and careful monitoring of the patient. Paradoxically, the treatment of glomerulonephritis has become even more complicated in the recent years, after the introduction of a number of newer immunosuppressive drugs. Extensively updated since publication of the first edition in 1997, this comprehensive yet concise guide to the treatment of even the most complex patients with primary glomerular diseases is full of practical information collected and organized in an easy-to-read manner. It encompasses the possible treatments of the different

types of primary glomerulonephritis, including diseases intrinsic to the kidney of unknown or uncertain aetiology. Each of the main chapters is devoted to a single primary glomerulonephritis and follows a similar format to allow easy access of information. The book contains not only an evidence-based review of the topic, but also practical recommendations from internationally recognized experts in the field.
